Calculating Welded Band Prices:

When calculating the price of a Welded Band, take the length and round up to the next half foot. (i.e. 17'4" = 17.5') Multiply the length times the price per foot and then add the Weld Charge. All prices per foot and Weld Charges are located at the top of each page.

EXAMPLE (Refer to Page 1)

Carbide Tipped Triple Chip 14' 8" x 1/2" x 3T

$$\text{Suggested Resale Price} - 15 \times \$15.95 = \$239.25 + \$10.97 = \$250.22$$

NEW X-51™ BLADES LAST LONGER IN HIGH-TEMPERATURE CUTTING APPLICATIONS NEVER YIELD TO STEEL!

Designed to handle the high temperatures generated when cutting exotic alloys and tough materials, X-51™ bi-metal bandsaw blades last longer than regular M42 blades, reducing replacement costs and blade changeover frequency.

X-51 features an M51 cutting edge to provide longer blade life cutting cast iron, tool steel, die steel, stainless steel, nickel based alloys, titanium, Inconel and other exotic alloys. With its superior combination of cobalt and tungsten at the cutting edge combined with a fatigue-resistant blade backer, X-51 greatly resists frictional heat failure at the tooth tip.

Steel service centers and production cutting operations will find the X-51 blades perfect for longer runs and cutting of large cross sections and high-temperature alloys. X-51 blades assist users in their quest to Never Yield To Steel!

X-51 bi-metal bandsaw blades are available with Sine-Wave® technology which provides an aggressive broaching action in the cut, enhancing cutting ability, reducing work time and increasing blade life.

For Matrix Plus Users

Matrix Plus has been replaced by the revolutionary patent pending design of BroadBand[®]. Please refer to pages 10 and 11 for BroadBand pricing.

BroadBand[®] Blades With Performance Design Reduce Cost and Make Bandsawing Easy!

BroadBand Advantages:

- Cuts a broader range of materials - low carbon to stainless steels.
- Cuts a broad range of shapes - structurals and solids.
- Cuts a broader range of sizes - smaller to larger cross-sections

BroadBand Delivers:

- **Faster** cutting rates.
- **Better** cut finishes.
- **Longer** blade life.

A8 BroadBand Bi-Metal bandsaw blades cover the broadest sawing applications and cut the broadest range of materials to reduce the number of costly blade changeovers. From production cutting to general purpose use, A8 BroadBand Bi-Metal bandsaw blades provide a high-performance, longer-lasting cutting experience.

A8 BroadBand bandsaw blades were developed for production cutting applications yet are perfectly suitable for everyday shop applications. Bandsaw machines are often required to cut a myriad of materials during a single day and are often run by multiple operators with different degrees of experience. A8 BroadBand bandsaw blades are robust and highly durable to reduce cutting application variables.
